ACKNOWLEDGMENTS

The information, analysis and documentation contained in this plan represents the cooperative effort between the United States Environmental Protection Agency (Region VII) and the Missouri Department of Natural Resources' Air Pollution Control Program.

The Missouri Department of Natural Resources' Air Pollution Control Program gratefully acknowledges participants' input.

1.0 Executive Summary

This state of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standard (NAAQS) has been written to fulfill the requirements of Section 110 of the Federal Clean Air Act Amendments (CAAA) of 1990. Section 110 of the CAAA requires that each state submit to the Administrator of the U.S. Environmental Protection Agency (EPA) a plan for the implementation, maintenance and enforcement of NAAQS in every air quality region within the state.

The NAAQS was revised for the new 8-hour ozone primary and secondary standards proposed by EPA on July 18, 1997 and finalized on April 30, 2004. The revised 8-hour ozone standards require that revised state plans be submitted within three (3) years after the rule's effective date (June 15, 2007), and after promulgation of the NAAQS for any pollutant.

The NAAQS for the new PM_{2.5} primary and secondary standards was proposed by EPA on July 18, 1997 and finalized on January 5, 2005. The new PM_{2.5} standards require that revised state plans be submitted within three (3) years after the rule's effective date (April 5, 2008) and after promulgation of NAAQS for any pollutant.

Environmental Defense and the American Lung Association filed suit against EPA alleging that EPA unreasonably delayed making determinations as to whether each state had submitted the remaining state implementation plan revisions required by CAA section 110 (a)(2) for implementation, maintenance and enforcement of the respective 1997 NAAQS. A Consent Decree was agreed to and signed that declared that State Implementation Plan (SIP) due dates are now December 15, 2007 for ozone and October 5, 2008 for PM_{2.5} thus extending the three (3) year SIP submittal requirements.

The content of this combined plan has been developed to demonstrate the continued attainment of primary and secondary standards for 8-hour ozone and for PM_{2.5} from the regulations for preparation, adoption and submittal of implementation plans codified in the Congressional Federal Record (CFR) at 40 CFR part 51, Appendix V, "Criteria for Determining the Completeness of Plan Submissions".

For the purpose of this plan, the state of Missouri consists of Out-state areas, the Kansas City metropolitan area and the St. Louis metropolitan area. These areas and designations are listed at 40 CFR part 81.326, "Designation of Areas for Air Quality Planning Purposes – Missouri".

This plan is for the entire state of Missouri. However, the Kansas City metropolitan area 8-hour ozone maintenance plan and the St. Louis metropolitan

area 8-hour ozone and PM_{2.5} nonattainment plans are being addressed separately from this document.

The state of Missouri acknowledges its responsibilities related to section 110(a) of the CAAA and reaffirms that the state has full authority under section 110(a) to implement the revised NAAQS.

Under the current SIP and Missouri statute (Appendix A), the state has the necessary infrastructure, resources and general authority to address the revised ozone and PM₁₀ standards and the new PM_{2.5} standards.

2.0 Time Line History

2.1 Ozone

The U.S. Environmental Protection Agency (EPA) established in 1971 a national primary and secondary maximum 1-hour National Ambient Air Quality Standards (NAAQS) ozone standard of 0.08 parts per million (ppm) that is not to be exceeded more than once per year. (See Federal Register, April 30, 1971, Volume 36, Number 84).

The 1972 Kansas City and Out-state state implementation plan (SIP) stated that Set II Pollutant Considerations (carbon monoxide (CO), nitrogen oxides (NO_x), hydrocarbon oxides (HC-O_x)) that because the levels of CO, NO_x, photochemical oxidants and hydrocarbons are generally well below the levels established as the secondary standards for these pollutants. It should be noted that control strategies for regions classified Priority III for any pollutant are not required by the federal government. (Set I Pollutants are particulate matter (PM) and sulfur oxides (SO_x).

Table I lists the final Air Quality Control Region (AQCR) Priority Classes for Out-state Missouri.

TABLE I

(AQCR)	PM	SO _x	CO	NO _x	HC-O _x
SW Intrastate	I	III	III	III	III
SE Intrastate	III	III	III	III	III
Northern Intrastate	II	III	III	III	III

Priority I Regions were required to submit:

- air quality and emissions data in detail;
- a control strategy that was tested and found to be appropriate and adequate;
- a comprehensive contingency plan for the prevention of air pollution emergency episodes; and finally
- an air quality surveillance network.

Priority II Regions are intermediate in scope and, therefore, fewer control strategies are required. Control strategies for regions classified as Priority III for any pollutant are not required.

On February 8, 1979, EPA revised the national primary and secondary maximum 1-hour ozone air quality standard to 0.12 ppm, with a 1-hour average not to be exceeded more than one day per year. (See Federal Register, February 8, 1979, Volume 44, Page 8202).

On July 18, 1997, EPA revised the 1-hour ozone air quality standard for ozone by replacing the 1979 standard with an 8-hour standard set at 0.08 ppm (See Federal Register, July 18, 1997, Volume 62, Number 138). Three states and dozens of industry plaintiffs quickly challenged the new standards. EPA announced that the 1-hour ozone standard will no longer apply to an area one year after the effective date of the designation of that area for the 8-hour ozone air quality standard. (See Federal Register, April 30, 2004, Volume 69, Number 84). EPA revoked the 1-hour ozone air quality standards on June 15, 2005, but the 1-hour ozone maintenance plan requirements will remain enforceable as part of the approved SIP until such time as EPA approves an 8-hour SIP. Out-state Missouri has always been in attainment for ozone.

2.2 Particulate Matter

EPA also promulgated PM total suspended particulate (TSP) NAAQS in 1971 which set the primary standard (the level where human health is affected) at $260 \mu\text{g}/\text{m}^3$ for a 24-hour average and $75 \mu\text{g}/\text{m}^3$ for an annual geometric mean. EPA set the secondary standard (the level where the public's welfare, other than health, such as property damage is affected) at $150 \mu\text{g}/\text{m}^3$ for a 24-hour average. The Clean Air Act requires EPA to review the standards every five years as new data becomes available, and revise any standard as justified.

On July 1, 1987, after extensive review and public comment covering a nine year period, EPA published its final decision in the Federal Register concerning a revision to the particulate matter standard, which became effective July 31, 1987. The revisions:

- replaced the pollutant indicator for the standard from TSP to PM_{10} ;
- set the primary, health related 24-hour standard to $150 \mu\text{g}/\text{m}^3$;
- set the primary annual standard to $50 \mu\text{g}/\text{m}^3$; and
- set the secondary standards equal to the primary standards.

2.2.1 Historical Particulate Matter Monitoring Network.

The original monitoring network was set up at the following locations:

1. St. Louis, MO
 - Eight monitors in the Missouri portion of the St. Louis metropolitan area
2. Kansas City, MO
 - Five monitors in the Missouri portion of the Kansas City metropolitan area
3. Springfield, MO
 - Three monitors
4. St. Joseph, MO
 - One monitor
5. Other monitors in the state
 - Hannibal, MO
 - Mexico, MO;
 - Columbia, MO
 - Herculaneum, MO; and
 - Mark Twain State Park in Monroe County.

2.2.2 Historical Analysis of Air Quality Data

Data for 1985, 1986 and 1987 showed no violations in the three-year-period of the PM_{10} NAAQS.

The data did show exceedances of the standards as follows:

- The monitor at St. Joseph had an annual mean value of $51.7 \mu\text{g}/\text{m}^3$ (exceeding 50) in 1985.
- The monitor in Mexico had a 24-hr exceedance of $164 \mu\text{g}/\text{m}^3$ (exceeding 150) on Aug. 1, 1987

The above exceedances were not violations of the standards for the following reasons:

1. The annual exceedance in St. Joseph in 1985 occurred before a change in monitoring equipment operation for PM_{10} was initiated by EPA in mid-1986. Following this change, lower values for PM_{10} (about 20 percent less) were being taken than before

the change at the same monitoring sites, and with that difference applied at the St. Joseph monitor for the 1985 exceedance, the adjusted value was below the annual standard.

2. The 24-hour exceedance in Mexico was the only one at that monitor during that calendar year. The standard allows one 24-hour exceedance per year at any one monitored site without being in violation of the standard.

On July 18, 1997, EPA revised the particulate matter standards to include a new national primary and secondary ambient air quality standard for PM_{2.5} (See Federal Register, July 18, 1997, Volume 62, Page 38711, Notices as amended at Federal Register July 30, 2004 Vol. 69. Page 45595).

Out-state Missouri has always been in attainment for the PM standards except for the exceedances addressed by the Columbia Particulate Matter SIP (1980), Mexico Particulate Matter SIP (1979) and St. Joseph Particulate Matter SIP (1980).

There have also been exceedances by point sources at times that have been addressed by consent agreements and through permit modifications. The charcoal industry has been regulated by rule 10 CRS 10-6.330 "Restriction of Emissions from Batch-Type Charcoal Kilns" because of excess PM and opacity violations in the past.

2.3 Long Range Transport

During the mid-1990's, the EPA, states, and local agencies began to evaluate the impacts of long range transport of emissions on nonattainment areas for NAAQS. This evaluation led to EPA's promulgation of a SIP call to reduce nitrogen oxide emissions (NO_x SIP Call). Missouri was not included in the first phase of the NO_x SIP Call. However, Missouri developed a NO_x transport regulation, 10 CSR 10-6.350 "Emission Limitations and Emissions Trading of Oxides of Nitrogen". This regulation was developed to fulfill the state's requirements under the EPA's 1-hour ozone attainment date extension policy as it applies to the St. Louis ozone nonattainment area. This regulation achieved NO_x emission reductions throughout the state of Missouri by placing an emission

rate limit on electric generating units and established a rate based trading program, similar to EPA's Acid Rain Program.

EPA promulgated Phase II of the NO_x SIP Call in 2004. The SIP call required Missouri to reduce NO_x emissions from electric generating units, cement kilns, industrial boilers, and stationary internal combustion engines. Missouri developed regulations to implement the requirements of EPA's NO_x SIP call. These regulations became effective in October of 2005 and were approved by the EPA on Aug. 15, 2006.

In March of 2005, EPA promulgated the Clean Air Interstate Rule (CAIR). This rule was designed to reduce NO_x and sulfur dioxide emissions from affected states to levels that would not significantly impact any neighboring states' ability to attain or maintain the NAAQS for ozone and fine particulate. This rule does apply to Missouri. Missouri began holding workgroup meetings to implement this rule in August of 2005 and is working toward rule development in response to CAIR. EPA finalized a Federal Implementation Plan for CAIR in April of 2006. This plan will remain in place until EPA approves a state plan.

3.0 All State Area Designations, (including out-state, Springfield/Greene County, Kansas City 8-Hour Ozone Maintenance Area and the St. Louis 8-Hour Ozone Nonattainment and Particulate Matter 2.5 nonattainment area)

3.1 All State Area Designations

All State Area Designations are listed in Appendix G

3.2 Out State Design Values

Out-State Design Values are listed in Appendix H

4.0 Administrative Requirements

4.1 Section 110: Requirements of the Clean Air Act Amendments of 1990

This section of the plan provides an explanation of how each applicable Clean Air Act (CAA) requirement is attained.

Implementation Plans Requirements of the Clean Air Act Amendments of 1990.

Section 110. Implementation Plans

(a)(1) Each state shall, after reasonable notice and public hearings, adopt and submit to the Administrator, within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof) under section 109 for any air pollutant, a plan which provides for implementation, maintenance, and enforcement of such primary standard in each air quality control region (or portion thereof) within such state. In addition, such state shall adopt and submit to the Administrator (either as a part of a plan submitted under the preceding sentence or separately) within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national ambient air quality secondary standard (or revision thereof), a plan which provides for implementation, maintenance, and enforcement of such secondary standard in each air quality control region (or portion thereof) within such state. Unless a separate public hearing is provided, each state shall consider its plan implementing such secondary standard at the hearing required by the first sentence of this paragraph.

The 1972 Kansas City and out state plan was written to fulfill the original national ambient air quality standards. As mentioned in the Executive Summary of this document, this new state of Missouri plan has been written to fulfill the CAA section 110(a)(1) requirements by including revisions to include the new 8-hour ozone and PM_{2.5} primary and secondary standards.

(2) Each implementation plan submitted by a state under this Act shall be adopted by the state after reasonable notice and public hearing. Each such plan shall—

(A) include enforceable emission limitations and other control measures, means, or techniques (including economic incentives such as fees, marketable permits, and auctions of emissions rights), as well as schedules and timetables for compliance, as may be necessary or appropriate to meet the applicable requirements of this Act;

State rule 10 CSR 10-6.010 “Ambient Air Quality Standards” and facilities individual rules, permits and consent agreements fulfill the requirements of 110(a)(2)(A).

- (2)(B) provide for establishment and operation of appropriate devices, methods, systems, and procedures necessary to –*
- (i) monitor, compile, and analyze data on ambient air quality, and*
 - (ii) upon request, make such data available to the Administrator;*

The department's Air Pollution Control Program's Air Quality Analysis Section was created to and is maintained to fulfill the requirements of 110(a)(2)(B).

(2)(C) include a program to provide for the enforcement of the measures described in subparagraph (A), and regulation of the modification and construction of any stationary source within the areas covered by the plan as necessary to assure that national ambient air quality standards are achieved, including a permit program as required in parts C and D;

The department's Air Pollution Control Program's Enforcement Section and Permits Section was created and is maintained to fulfill the requirements of 110(a)(2)(C).

- (2)(D) contain adequate provisions –*
- (i) prohibiting, consistent with the provisions of this title, any source or other type of emissions activity within the state from emitting any air pollutant in amounts which will –*
 - (I) contribute significantly to nonattainment in, or interfere with maintenance by, any other state with respect to any such national primary or secondary ambient air quality standard, or*
 - (II) interfere with measures required to be included in the applicable implementation plan for any other state under part C to prevent significant deterioration of air quality or to protect visibility,*
 - (III) insuring compliance with the applicable requirements of sections 126 and 115 (relating to interstate and international pollution abatement);*

To fulfill the requirements of section 110 (a)(2)(D), several actions have been implemented over time.

Visibility Protection

EPA has made no determination that emissions from any state interfere with 1980 visibility plan measures required to be included in a plan to address reasonably attributable visibility impairment. EPA is not aware of any certification of existing reasonably attributable impairment of visibility by a Federal Land Manager that has not already been resolved.

Based on this information, no source in Missouri emits pollutants that interfere with measures included in visibility plans under 1980 regulations.

At this time, Missouri's current nonattainment/maintenance plans for the 8-hour ozone and PM_{2.5} NAAQS are under development. It is expected that these plans will benefit visibility protected areas in Missouri and other neighboring states. This is primarily due to the inclusion of NO_x and SO₂ controls under the Clean Air Interstate Rule and NO_x SIP call regulations. Also, Missouri is working with the Central States Regional Air Partnership (CENRAP) regional planning organization in development of a regional haze plan that is due to be submitted to EPA December 2007. This on-going regional haze plan development process is intended to address incoming visibility impairing pollutants from sources in other states and Missouri source contribution on Missouri Class I areas as well as other states' protected areas.

Prevention of Significant Deterioration

All major sources located in attainment areas in the State of Missouri are currently subject to Prevention of Significant Deterioration (PSD) permitting under state rule 10 CSR 10-6.060 Construction Permits Required section (8). Major sources located in nonattainment areas are currently regulated under a Nonattainment New Source Review (NNSR) permitting program under state rule 10 CSR 10-6.060 Construction Permits Required section (7). Missouri believes that the current rule 10 CSR 10-6.060 Construction Permits Required rule meets the requirements of the Phase II ozone implementation rule as St. Louis is classified as a moderate ozone nonattainment area. Missouri will follow EPA's most current policy on the implementation of all PSD and NNSR regulations as they relate to the implementation of the NAAQS. Missouri will also adopt EPA's revised regulations implementing the revisions to the NAAQS as expeditiously as possible. This will include the adoption of permitting requirements into the state permitting rules as soon as possible.

Prevention of Significant Contribution

Several rules have been implemented and are in development to prevent Missouri emissions from significantly contributing to nonattainment in other states or interfering with maintenance in other states with respect to any such national primary or secondary ambient air quality standard.

Four (4) rules have been implemented to establish a NO_x emissions trading program for the state of Missouri; establish an emission budget for large electric generating units and non-electric generating boilers; establish NO_x control equipment and NO_x emission levels for cement kilns; and establish emission levels for large stationary internal combustion engines.

These four (4) state rules are 10 CSR 10-6.350 “Emission Limitations and Emissions Trading of Oxides of Nitrogen”; 10 CSR 10-6.360 “Control of NO_x Emissions From Electric Generating Units and Non-Electric Generating Boilers”; 10 CSR 10-6.380 “Control of NO_x Emissions From Portland Cement Kilns”; and 10 CSR 10-6.390 “Control of NO_x Emissions From Large Stationary Internal Combustion Engines”.

Four (4) additional rules are in development to address a Clean Air Interstate Rule Annual NO_x Trading Program; a Clean Air Interstate Rule Seasonal NO_x Trading Program; a Clean Air Interstate Rule SO₂ Trading Program; and Control of Mercury Emissions From Electric Generating Units. (See Appendix J for Clean Air Interstate Rules and Clean Air Mercury Rule MACC Adoption Certifications).

(2)(E) provide (i) necessary assurances that the state (or, except where the Administrator deems inappropriate, the general purpose local government or governments, or a regional agency designated by the state or general purpose local governments for such purpose) will have adequate personnel, funding, and authority under state (and, as appropriate, local) law to carry out such implementation plan (and is not prohibited by any provision of Federal or state law from carrying out such implementation plan or portion thereof), (ii) requirements that the state comply with the requirements respecting state boards under section 128, and (iii) necessary assurances that, where the state has relied on a local or regional government, agency, or instrumentality for the implementation of any plan provision, the state has responsibility for ensuring adequate implementation of such plan provision;

The Missouri Air Conservation Law (643.079, RSMo) requires the Missouri Air Conservation Commission to set an annual air pollution emission fee to fund the reasonable cost of administering this law. Section 643, RSMo also provides the authority necessary to carry out the state implementation plan requirements. The department’s Air Pollution Control Program also has signed state and local agreements with St Louis City, St. Louis County, Kansas City and Springfield/and with the surrounding states fulfills the requirements of 110(a)(2)(E).

(2)(F) require, as may be prescribed by the Administrator –

- (i) the installation, maintenance, and replacement of equipment, and the implementation of other necessary steps, by owners or operators of stationary sources to monitor emissions from such sources,*
- (ii) periodic reports on the nature and amounts of emissions and emissions-related data from such sources, and*
- (iii) correlation of such reports by the State agency with any emission limitations or standards established pursuant to*

this Act, which reports shall be available at reasonable times for public inspection;

State rule requirements fulfill the requirements of 110(a)(2)(F).

(2)(G) provide for authority comparable to that in section 303 and adequate contingency plans to implement such authority;

State rule 10 CSR 10-6.130 “Controlling Emissions During Episodes of High Air Pollution Potential” and contingency elements in the St. Louis nonattainment SIP and Kansas City maintenance SIP fulfill the requirements of 110(a)(2)(G).

(2)(H) provide for revision of such plan –

- (i) from time to time as may be necessary to take account of revisions of such national primary or secondary ambient air quality standard or the availability of improved or more expeditious methods of attaining such standard, and*
- (ii) except as provided in paragraph (3)(C), whenever the Administrator finds on the basis of information available to the Administrator that the plan is substantially inadequate to attain the national ambient air quality standard which it implements or to otherwise comply with any additional requirements established under this Act;*

Affirmation letter dated September 27, 2004 to Chief, Air Planning and Development Branch, U.S. Environmental Protection Agency, Region VII regarding the state of Missouri’s responsibilities related to section 110(a) of the Clean Air Act. This letter reaffirms that we have full authority under section 110(a) to implement the revised National Ambient Air Quality Standards and fulfills the requirements of 110(a)(2)(H).

(2)(I) in the case of a plan or plan revision for an area designated as a nonattainment area, meet the applicable requirements of part D (relating to nonattainment areas);

Affirmation letter dated September 27, 2004 to Chief, Air Planning and Development Branch, U.S. Environmental Protection Agency, Region VII regarding the state of Missouri’s responsibilities related to section 110(a) of the Clean Air Act. This letter reaffirms that we have full authority under section 110(a) to implement the revised National Ambient Air Quality Standards and fulfills the requirements of 110(a)(2)(I).

(2)(J) meet the applicable requirements of section 121 (relating to consultation), section 127 (relating to public notification), and part C

(relating to prevention of significant deterioration of air quality and visibility protection);

The department's Air Pollution Control Program's rulemaking process public participation fulfills the requirements of 110(a)(2)(J).

(2)(K) provide for –

- (i) the performance of such air quality modeling as the Administrator may prescribe for the purpose of predicting the effect on ambient air quality of any emissions of any air pollutant for which the Administrator has established a national ambient air quality standard, and*
- (ii) the submission, upon request, of data related to such air quality modeling to the Administrator;*

The department's Air Pollution Control Program's Air Quality Analysis Section was created and is maintained to fulfill the requirements of 110(a)(2)(K).

(2)(L) require the owner or operator of each major stationary source to pay to the permitting authority, as a condition of any permit required under this Act, a fee sufficient to cover –

- (i) the reasonable costs of reviewing and acting upon any application for such a permit, and*
- (ii) if the owner or operator receives a permit for such source, the reasonable costs of implementing and enforcing the terms and conditions of any such permit (not including any court costs or other costs associated with any enforcement action),*

until such fee requirement is superseded with respect to such sources by the Administrator's approval of a fee program under title V;

The department's Air Pollution Control Program's Permits Section and rules 10 CSR 10-6.060 Construction Permits Required, 10 CSR 10-6.061 Construction Permit Exemptions, 10 CSR 10-6.062 Construction Permits by Rule and 10 CSR 10-6.065 Operating Permits fulfills the requirements of 110(a)(2)(L).

(2)(M) provide for consultation and participation by local political subdivisions affected by the plan.

The department's Air Pollution Control Program's signed State and Local Agreements with St Louis City, St. Louis County, Kansas City and Springfield/Greene as well as participation with the Mid-America Regional Council; East-West Gateway Coordinating Council; the St.

Louis East-West Gateway Council of Governments and rulemaking process public participation fulfills the requirements of 110(a)(2)(M).

4.2 Legal Authority

The Missouri Air Conservation Commission (MACC) is granted legal authority to develop and implement regulations regarding air pollution under section 643.050 of the Revised Statutes of Missouri (RSMo).

Under the current SIP and Missouri statutes, the state has the necessary infrastructure, resources and general authority to address the new 8-hour ozone air quality and PM_{2.5} standards.

The specific powers and duties of the state are outlined in section 643.050, RSMo “Powers and Duties of the Commission”, 643.055, RSMo “Commission May Adopt Rules for Compliance with Federal Law”, and 643.060, RSMo “Powers and Duties of Director”.

The MACC is the air pollution control agency of the state and has the authority, pursuant to chapter 536, RSMo “Administrative Procedure and Review”, to promulgate rules and regulations to establish standards and guidelines to ensure that the State of Missouri is in compliance with the provisions of the federal Clean Air Act.

These statutes grant the MACC and the director direct authority to implement any federal standards through state rules and procedures. A copy of the Missouri Air Conservation Law (Appendix A) that pertains to the powers and duties of the commission and the director are in sections 643.010-643.070, RSMo. Missouri’s complete air law is in sections 643.010-643.620, RSMo.

4.3 Commitment to Revise Plans

An affirmation letter, (Appendix B), dated Sept. 27, 2004 to Chief, Air Planning and Development Branch, U.S. Environmental Protection Agency, Region VII regarding the state of Missouri’s responsibilities related to section 110(a) of the Clean Air Act. This letter reaffirms that we have full authority under section 110(a) to implement the revised National Ambient Air Quality Standards.

4.4 Public Hearing Notice and Certification

The Missouri Department of Natural Resources’ Air Pollution Control Program is required to announce a public hearing at least 30 days prior to holding such hearing. This was accomplished by announcements submitted to newspapers at least 30 days prior to the public hearing which occurred on December 7, 2006. The public hearing notice along with

certification of publication of the public notice for this plan amendment is in Appendix D.

4.5 Comments, Responses and Explanations of Change

The department's Air Pollution Control Program's responses to comments received during the open public comment period on this plan are in Appendix E. The comment period was open for seven (7) days after the Public Hearing on December 7, 2006. The department's Air Pollution Control Program is required to respond to all comments.

4.6 Missouri Air Conservation Commission Adoption Certification

The MACC adoption certification to demonstrate approval by the commission of the state implementation plan amendment is in Appendix F.

5.0 Quality Assurance Program

The department's Air Pollution Control Program quality assures all data in accordance with 40 CFR 58.10 and the department's Air Pollution Control Program standard operating procedures for operating the ambient monitoring networks and validating the data. The department's Air Pollution Control Program records the data in the U.S. Environmental Protection Agency's (EPA's) Aerometric Information Retrieval System (AIRS) database, which is available to the public.

5.1 Air Quality Analysis for 2005 Air Quality (9/30/05)

The following information is for the ambient air monitors operated by all reporting organizations including state, local, and industry which is updated to the EPA AIRS database for 2005. The total number of exceedances of the NAAQS to date in 2005 are summarized below:

- **Ozone**

All areas in the state are in compliance with the 1-hour ozone air quality standard. St. Louis is classified as a moderate non-attainment area for the 8-hour standard. There were 98 exceedances of the 8-hour ozone air quality standard in 2005. Two sites, West Alton and Orchard Farm, are in violation for 2003 to 2005.

- **PM_{2.5}**

All Missouri sites now meet both the 24-hour and annual standards. The St. Louis area remains in violation for 2002 to 2004 due to two Illinois sites, Granite City (16.9 $\mu\text{g}/\text{m}^3$) and East St. Louis (15.4 $\mu\text{g}/\text{m}^3$), that are over the annual standard.

- **Data Completeness**

Data completeness for Missouri is typically excellent, averaging percentages in the high 90s. Data completeness for the first three calendar quarters was 97%, 97%, and 96%. The Ladue PM_{2.5} monitor lacked the most complete data at 57% in the second quarter and 36% in the third due to mechanical problems. Only one other monitor has a quarter less than 75%, the PM_{2.5} sampler at the University of Missouri, Kansas City. This, however, was attributable to operator error.

6.2 Appendix B Commitment Letter to Revise Plans

Affirmation letter dated September 27, 2004 to Chief, Air Planning and Development Branch, U.S. Environmental Protection Agency, Region VII regarding the state of Missouri's responsibilities related to section 110(a) of the Clean Air Act. This letter reaffirms that we have full authority under section 110(a) to implement the revised National Ambient Air Quality Standards.

Bob Holden, Governor • Stephen M. Mahfood, Director

DEPARTMENT OF NATURAL RESOURCES

www.dnr.mo.gov

SEP 27 2004

Mr. Joshua A. Tapp
Chief, Air Planning and Development Branch
EPA Region VII
901 North 5th Street
Kansas City, KS 66101

Dear Mr. Tapp:

This letter is in response to your correspondence of April 29, 2004, to Ms. Leanne J. Tippet regarding the state of Missouri's responsibilities related to section 110(a) of the Clean Air Act. This letter reaffirms that we have full authority under section 110(a) to implement the revised National Ambient Air Quality Standards (NAAQS).

Pursuant to the revised and new NAAQS for ozone and particulate matter (PM), we have evaluated the rules in our current state implementation plan (SIP) to determine if any revisions are necessary.

Under the current SIP and Missouri statute, the state has the necessary infrastructure and general authority to address the revised ozone and PM₁₀ standards and the new PM_{2.5} standard. Specifically, 643.050, RSMo Powers and Duties of the Commission, 643.055, RSMo Commission May Adopt Rules for Compliance with Federal Law, and 643.060, RSMo Powers and Duties of Director grant the Missouri Air Conservation Commission and the Director of the Department of Natural Resources direct authority to implement any federal standards through state rules and procedures.

We have evaluated our current SIP for section 110 ("110 SIP") with regards to the new standards. The current SIP can be amended to implement the revised ozone and new PM₁₀ and PM_{2.5} emissions inventories, monitoring networks, and modeling. All control measures under the old PM₁₀ standard have been implemented and continue to be enforced except rule 10 CSR 10-6.330 Restriction of Emissions from Batch-Type Charcoal Kilns. This rule was adopted on March 26, 1998, and was effective on July 30, 1998. The phasing in of control of the kilns will be finalized in 2005.

Missouri is committed to revising the following state rules for ozone and particulate matter by the June 15, 2007 deadline as necessary so that they reflect the revised ozone and particulate standards.

Integrity and excellence in all we do

Mr. Joshua A. Tapp
Page Two

1. 10 CSR 10-6.010 Ambient Air Quality Standards.
 - Update Table to reflect new revisions to the NAAQS.
2. 10 CSR 10-6.020 Definitions and Common Reference Tables.
 - Add PM_{2.5} definition.
 - Update Table 1 to include PM_{2.5} and to reflect new revisions to the NAAQS.
3. 10 CSR 10-6.030 Sampling Methods for Air Pollution Sources.
 - Update 6.030(5), Particulate Emissions, to include a better explanation of PM_{2.5} monitoring.
4. 10 CSR 10-6.040 Reference Methods.
 - Update 6.040(4) to include the new PM_{2.5} standard.
5. 10 CSR 10-6.060 Construction Permits Required.
 - Update Table 6.060(11)(A) to include PM_{2.5}.
 - Update Table 6.060 (11)(B) to include PM_{2.5} if required.
 - Update Table 6.060(11)(D) to include PM_{2.5}.
 - Update Table 6.060(12) Appendix H to include the new PM_{2.5} standard.
 - Update Emissions Inventory Questionnaire to include PM_{2.5}.
 - Update Form 3.0, Emission Fee Calculation to include PM_{2.5}.
6. 10 CSR 10-6.065 Operating Permits.
 - Update 6.065(1)(D)3.D. to include PM_{2.5}.
7. 10 CSR 10-6.130 Controlling Emissions During Episodes of High Air Pollution Potential.
(Please note this rule currently requires no change but it will be reviewed for any necessary changes when EPA updates 40 CFR part 51, Appendix L in the future.)
8. 10 CSR 10-2.390 Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Laws.
(Please note this rule will need to be updated to include PM_{2.5} when the federal conformity rules are updated to include PM_{2.5}.)
9. 10 CSR 10-5.480 Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. or the Federal Transit Laws
(Please note this rule will need to be updated to include PM_{2.5} when the federal conformity rules are updated to include PM_{2.5}.)

Mr. Joshua A. Tapp

MISSOURI AIR CONSERVATION COMMISSION
WILL HOLD PUBLIC HEARING

JEFFERSON CITY, MO -- The Missouri Air Conservation Commission will hold a public hearing on Construction Permits By Rule; Clean Air Interstate Rule Annual, Seasonal, and Sulfur Dioxide (SO2) Trading Programs; Emission Limitations and Emissions Trading of Oxides of Nitrogen; Control of NOx Emissions From Electric Generating Units and Non-Electric Generating Boilers; Control of Mercury Emissions From Electric Generating Units; and State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards on Thursday, December 7, 2006. The Public Hearing will begin at 9 a.m. at the Elm Street Conference Center, 1738 East Elm Street, Lower Level, Roaring River Conference Room, Jefferson City, MO. The commission will hear testimony related to the following rule actions.

* 10 CSR 10-6.062 Construction Permits By Rule

This proposed amendment addresses the U.S. Environmental Protection Agency's (EPA's) concerns that the rule as written doesn't provide a clear pre-construction review period and therefore, isn't approvable into the State Implementation Plan. Language is added to state the department has seven (7) days to do a pre-construction permit review.

* 10 CSR 10-6.362 Clean Air Interstate Rule Annual NOx Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NOx emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.364 Clean Air Interstate Rule Seasonal NOx Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NOx emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.366 Clean Air Interstate Rule SO2 Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce SO2 emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.350 Emission Limitations and Emissions Trading of Oxides of Nitrogen

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

* 10 CSR 10-6.360 Control of NOx Emissions From Electric Generating Units and Non-Electric Generating Boilers

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

* 10 CSR 10-6.368 Control of Mercury Emissions From Electric Generating Units

The U.S. Environmental Protection Agency's (EPA) Clean Mercury Interstate Rule required states to develop regulations to reduce mercury emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* Missouri State Implementation Plan - State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards

The purpose of this document is to fulfill the requirements of Section 110 of the Federal Clean Air Act Amendments (CAAA) of 1990. Section 110 of the CAAA requires that each state submit to the Administrator of the U.S. Environmental Protection Agency (EPA) a plan for the implementation, maintenance and enforcement of the National Ambient Air Quality Standards in every air quality region within the state. This plan demonstrates the continued attainment of the primary and secondary standards for 8-hour ozone and for PM2.5.

The above documents will be available for review at the following locations: Missouri Department of Natural Resources, Air Pollution Control Program, 1659 Elm Street, Jefferson City, (573) 751-4817; Kansas City Regional Office, 500 NE Colbern Road, Lee's Summit, (816) 622-7000; Northeast Regional Office, 1709 Prospect Drive, Macon, (660) 385-2129; Southeast Regional Office, 2155 N. Westwood Boulevard, Poplar Bluff, (573) 840-9750; St. Louis Regional Office, 7545 S. Lindberg, Suite 210, St. Louis, (314) 416-2960; Southwest Regional Office, 2640 W. Woodland, Springfield, (417) 691-4300.

Persons with disabilities requiring special services or accommodations to attend the meeting can make arrangements by calling the department directly at (573) 751-7846, the department's toll free number at (800) 334-6946, or by writing two weeks in advance of the meeting to: Missouri Department of Natural Resources, Air Conservation Commission Secretary, P.O. Box 176, Jefferson City, MO 65102. Hearing impaired persons may contact the program through Relay Missouri, (800) 735-2966.

The commission holds public hearings under the provisions of chapter 643, RSMo. Citizens wishing to speak at the public hearing should notify the secretary to the Missouri Air Conservation Commission, Missouri Department of Natural Resources, Air Pollution Control Program, P.O. Box 176, Jefferson City, Missouri 65102-0176, or telephone (573) 751-7846. The department requests persons intending to give verbal presentations also provide a written copy of their testimony to the commission secretary at the time of the public hearing. The department also will accept written comments for the record until 5 p.m. on December 14, 2006; please send two copies of written comments to Chief, Operations Section, Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176.

Rule proposals considered at this hearing may be adopted by the Missouri Air Conservation Commission as provided for under authority of 643.050, RSMo. For

MISSOURI AIR CONSERVATION COMMISSION WILL HOLD PUBLIC HEARING

JEFFERSON CITY, MO -- The Missouri Air Conservation Commission will hold a public hearing on Construction Permits By Rule; Clean Air Interstate Rule Annual, Seasonal, and Sulfur Dioxide (SO₂) Trading Programs; Emission Limitations and Emissions Trading of Oxides of Nitrogen; Control of NO_x Emissions From Electric Generating Units and Non-Electric Generating Boilers; Control of Mercury Emissions From Electric Generating Units; and State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards on Thursday, December 7, 2006. The Public Hearing will begin at 9 a.m. at the Elm Street Conference Center, 1738 East Elm Street, Lower Level, Roaring River Conference Room, Jefferson City, MO. The commission will hear testimony related to the following rule actions.

10 CSR 10-6.062 Construction Permits By Rule

This proposed amendment addresses the U.S. Environmental Protection Agency's (EPA's) concerns that the rule as written does not provide a clear pre-construction review period, and therefore, isn't approvable into the State Implementation Plan. Language is being added to state the department has seven (7) days to do a pre-construction permit review.

10 CSR 10-6.362 Clean Air Interstate Rule Annual NO_x Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NO_x emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

10 CSR 10-6.364 Clean Air Interstate Rule Seasonal NO_x Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NO_x emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

10 CSR 10-6.366 Clean Air Interstate Rule SO₂ Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce SO₂ emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

10 CSR 10-6.350 Emission Limitations and Emissions Trading of Oxides of Nitrogen

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

10 CSR 10-6.360 Control of NO_x Emissions From Electric Generating Units and Non-Electric Generating Boilers

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

10 CSR 10-6.368 Control of Mercury Emissions From Electric Generating Units

The U.S. Environmental Protection Agency's (EPA) Clean Mercury Interstate Rule required states to develop regulations to reduce mercury emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

For more information or a complete meeting agenda, including rules being presented for adoption, contact the Missouri Department of Natural Resources Air Pollution Control Program at (573) 751-4817.

JEFFERSON CITY, MO - The Missouri Air Conservation Commission will hold a public hearing on Construction Permits By Rule; Clean Air Interstate Rule annual, Seasonal, and Sulfur Dioxide (SO₂) Trading Programs; Emission Limitations and Emissions Trading of Oxides of Nitrogen; Control of NO_x Emissions from Electric Generating Units; and State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards on Thursday, December 7, 2006. The Public Hearing will begin at 9 a.m. at the Elm Street Conference Center, 1738 East Elm Street, Lower Level, Roaring River Conference Room, Jefferson City, MO. The commission will hear testimony related to the following rule actions.

***10 CSR 10-6.062 Construction Permits By Rule**

This proposed amendment addresses the U.S. Environmental Protection Agency's (EPA's) concerns that the rule as written doesn't provide a clear pre-construction review period and therefore, isn't approvable into the State Implementation Plan. Language is being added to state the department has seven (7) days to do a pre-construction permit review.

***10 CSR 10-6.362 Clean Air Interstate Rule Annual NO_x Trading Program**

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NO_x emissions from electric generating units beginning in 2009. The proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

***10 CSR 10-6.364 Clean Air Interstate Rule Seasonal NO_x Trading Program**

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NO_x emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

***10 CSR 10-6.366 Clean Air Interstate Rule SO₂ Trading Program**

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce SO₂ emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

***10 CSR 10-6.350 Emission Limitations and Emissions Trading of Oxides of Nitrogen**

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

***10 CSR 10-6.360 Control of NO_x Emissions from Electric Generating Units and Non-Electric Generating Boilers**

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

***10 CSR 10-6.368 Control of Mercury Emissions from Electric Generating Units**

The U.S. Environmental Protection Agency's (EPA) Clean Mercury Interstate Rule required states to develop regulations to reduce mercury emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

***Missouri State Implementation Plan - State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards**

The purpose of this document is to fulfill the requirements of Section 110 of the Federal Clean Air Act Amendments (CAAA) of 1990. Section 110 of the CAAA requires that each state submit to the Administrator of the U.S. Environmental Protection Agency (EPA) a plan for the implementation, maintenance and enforcement of the National Ambient Air Quality Standards in every air quality region within the state. This plan demonstrates the continued attainment of the primary and secondary standards for 8-hour ozone and for PM_{2.5}.

The above documents will be available for review at the following locations: Missouri Department of Natural Resources, Air Pollution Control Program, 1659 Elm Street, Jefferson City, (573) 751-4817; Kansas City Regional Office, 500 NE Colbern Road, Lee's Summit, (816) 622-7000; Northeast Regional Office, 1709 Prospect Drive, Macon, (660) 385-2129; Southeast Regional Office, 2155 N Westwood Boulevard, Poplar Bluff, (573) 840-9750; St. Louis Regional Office, 7545 S Lingberg, Suite 210, St. Louis, (314) 416-2960; Southwest Regional Office, 2040 W Woodland, Springfield, (417) 891-4300.

Persons with disabilities requiring special services or accommodations to attend the meeting can make arrangements by calling the department directly at (573) 751-7840, the department's toll free number at (800) 334-6946, or by writing two weeks in advance of the meeting to: Missouri Department of Natural Resources, Air Conservation Commission Secretary, P.O. Box 176, Jefferson City, MO 65102. Hear-

MISSOURI AIR CONSERVATION COMMISSION WILL HOLD PUBLIC HEARING

JEFFERSON CITY, MO -- The Missouri Air Conservation Commission will hold a public hearing on Construction Permits by Rule; Clean Air Interstate Rule Annual, Seasonal, and Sulfur Dioxide (SO2) Trading Programs; Emission Limitations and Emissions Trading of Oxides of Nitrogen; Control of NOx Emissions From Electric Generating Units and Non-Electric Generating Boilers; Control of Mercury Emissions From Electric Generating Units; and State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards on Thursday, December 7, 2006. The Public Hearing will begin at 9 a.m. at the Elm Street Conference Center, 1738 East Elm Street, Lower Level, Roaring River Conference Room, Jefferson City, MO. The commission will hear testimony related to the following rule actions.

* 10 CSR 10-6.062 Construction Permits By Rule

The proposed amendment addresses the U.S. Environmental Protection Agency's (EPA's) concerns that the rule as written doesn't provide a clear pre-construction review period and therefore, isn't approvable into the State Implementation Plan. Language is being added to state the department has seven (7) days to do a pre-construction permit review.

* 10 CSR 10-6.362 Clean Air Interstate Rule Annual NOx Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NOx emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.364 Clean Air Interstate Rule Seasonal NOx Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce NOx emissions from electric generating units beginning in 2009. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.366 Clean Air Interstate Rule SO₂ Trading Program

The U.S. Environmental Protection Agency's (EPA) Clean Air Interstate Rule required states to develop regulations to reduce SO₂ emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* 10 CSR 10-6.350 Emission Limitations and Emissions Trading of Oxides of Nitrogen

This proposed amendment would remove the requirements of this rule upon the implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

* 10 CSR 10-6.360 Control of NO_x Emissions From Electric Generating Units and Non-Electric Generating Boilers

This proposed amendment would remove the requirements of this rule upon implementation of proposed rule 10 CSR 10-6.362. The requirements of 10 CSR 10-6.362 are more stringent than this rule.

* 10 CSR 10-6.368 Control of Mercury Emissions From Electric Generating Units

The U.S. Environmental Protection Agency's (EPA) Clean Mercury Interstate Rule required states to develop regulations to reduce mercury emissions from electric generating units beginning in 2010. This proposed rule will accomplish that goal by including Missouri's affected sources in the regional trading program established by EPA.

* Missouri State Implementation Plan - State of Missouri Plan for Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards

The Purpose of this document is to fulfill the requirements of section 110 of the Federal Clean Air Act Amendments (CAAA) of 1990. Section 110 of the CAAA requires that each state submit to the Administrator of the U.S. Environmental Protection Agency (EPA) a plan for the implementation, maintenance and enforcement of the National Ambient Air Quality Standards in every air quality region within the state. This plan demonstrates the continued attainment of the primary and secondary standards for 8-hour ozone and for PM_{2.5}.

The above documents will be available for review at the following locations: Missouri Department of Natural Resources, Air Pollution Control Program, 1659 Elm Street, Jefferson City, (573) 751-4817; Kansas City Regional Office, 500 NE Colbern Road, Lee's Summit, (816) 622-7000; Northeast Regional Office, 1709 Prospect Drive, Macon, (660) 385-2129; Southeast Regional Office, 2155 N. Westwood Boulevard, Poplar Bluff, (573) 840-9750; St. Louis Regional Office, 7545 S. Lindberg, Suite 210, St. Louis, (314) 416-2960; Southwest Regional Office, 2040 W. 3 diplomacy and negotiation to make this possible. And I
4 should extend that to the stakeholders who I know are here
5 in the meeting today as well as the Energy Center I notice
6 is here today as well. So that commendation should be
7 extended to them.

8 This does conclude my comments on these rules.
9 If there are any questions, I'd be happy to try and
10 address them at this time.

11 COMMISSIONER BAKER: Anybody have any questions
12 for Michael?

13 COMMISSIONER FOHEY: No.

14 COMMISSIONER BAKER: Okay.

15 MR. JAY: Thank you.

16 COMMISSIONER BAKER: Okay. Thank you for your
17 comments, and thanks on a job well done. The next one on
18 the list would be Paul McConnell.

19 PAUL MCCONNELL,
20 being first duly sworn to testify the truth, the whole
21 truth, and nothing but the truth, testified as follows:

22 MR. MCCONNELL: Chairman, Members of the
23 Commission, my name is Paul McConnell. I am employed with
24 the Air Pollution Control Program as an Environmental
25 Engineer. I work at 1659 East Elm Street, Jefferson City,

1 Missouri.

2 I'm here to present this proposed revision to
3 the Missouri State Implementation Plan, SIP. The plan
4 title is Implementation, Maintenance and Enforcement of
5 National Ambient Air Quality Standards.

6 This proposed change to the SIP will update
7 Section 110(a), Implementation Plan requirements, to
8 include the criteria pollutant National Ambient Air
9 Quality Standards, or NAAQS, new and revised eight-hour
10 ozone and fine particulate matter of PM2.5 standards
11 recently finalized.

12 This proposed plan action is on page 275 of the
13 briefing document. However, the complete Missouri SIP
14 element has not been reprinted in the briefing document
15 due to its volume. The entire -- the entire document is
16 available for review at the Department of Natural
17 Resources Air Pollution Control Program, P.O. Box 176,
18 Jefferson City, Missouri, 65102-0176. It is also
19 available online at
20 <http://www.dnr.mo.gov/env/apcp/docs/sip-naaqs.pdf>.

21 Background Ozone. U.S. Environmental Protection
22 Agency (EPA) established in 1971 a national primary and
23 secondary maximum one-hour NAAQS ozone standard of .08
24 parts per million. That is not to be exceeded more than
25 once per year.

APPENDIX E

6.5 Appendix E December 7, 2006 Public Hearing Comments and Responses

**COMMENTS AND RESPONSES ON
PROPOSED REVISIONS TO
THE STATE OF MISSOURI PLAN FOR
IMPLEMENTATION, MAINTENANCE AND ENFORCEMENT OF
NATIONAL AMBIENT AIR QUALITY STANDARDS**

On December 7, 2006, the Missouri Air Conservation Commission held a public hearing concerning a proposed revision to the Missouri State Implementation Plan (SIP) for the Implementation, Maintenance and Enforcement of National Ambient Air Quality Standards (NAAQS) plan. The following is a summary of comments received and the Missouri Department of Natural Resources' corresponding responses. Any changes to the proposed SIP are identified in the responses to comments.

SUMMARY OF COMMENTS: The Missouri Department of Natural Resources' Air Pollution Control Program received five (5) comments from the U.S. Environmental Protection Agency (EPA). EPA comments relate to clarifying the submission as it pertains to 110(a)(2)(D)(i). EPA also commented that they are reserving comments on the remainder of this plan until such time that EPA provides further guidance on aspects of 110 (other than Section 110(a)(2)(D)(i)).

COMMENT: The EPA suggests that Missouri separate the section of this document that specifically addresses Section 110(a)(2)(D)(i) from submittal and submit this portion separately to EPA for inclusion into the SIP. By separating out the portion of the submittal dealing with 110(a)(2)(D)(i), Missouri will be able to clearly address EPA's finding made in April 2005 that states failed to make statutorily required plan submissions addressing 110(a)(2)(D)(i) of the Clean Air Act (CAA) pertaining to interstate transport.

In regards to the portion of the SIP submittal which addresses all other requirements of 110(a)(1) and (2), Missouri's SIP submission addressing the 8-hour ozone NAAQS is due on December 15, 2007 and the PM_{2.5} NAAQS is due on October 5, 2008. As indicated in the August 2006 EPA guidance, the Agency intends to provide states with additional information concerning the elements of this SIP submittal, in separate regulations or guidance documents.

RESPONSE: Separating the section of this document that addresses Section 110(a)(2)(D)(i) would result in a disjointed document that is intended to address Section 110(a) requirements. When additional guidance is available for all other requirements of 110(a)(1) and (2), this plan will be reviewed and any revisions deemed necessary will be made as a revision to this document. Therefore, no changes have been made to this plan as a result of this comment. However, there were language changes made as a result of other comments to clarify which section of the document specifically addresses the requirements of 110(a)(2)(D)(i) of the CAA and to identify the elements the CAA requires to be addressed.

COMMENT: The EPA suggests that a short background section be included in the portion of the document that addresses 110(a)(2)(D)(i) to provide an explanation of this separate submittal.

RESPONSE: Since a separate submittal is not planned for the section of the document that addresses 110(a)(2)(D)(i), a separate background is not necessary since the Executive Summary in the plan covers background information. Therefore, no changes have been made to this plan as a result of this comment.

COMMENT: The EPA also commented that headings should be included in the section of the document that addresses 110(a)(2)(D)(i) of the CAA to clearly identify the elements required to be addressed (such as significant contribution, visibility protection and prevention of significant deterioration).

RESPONSE AND EXPLANATION OF CHANGE: As a result of this comment, headings have been added to identify the elements required to be addressed under 110(a)(2)(D)(i) of the CAA. These headings are: Visibility Protection, Prevention of Significant Deterioration, and Significant Contribution.

COMMENT: For the portion of 110(a)(2)(D)(i) which addresses prevention of significant deterioration, EPA suggests providing further clarification that Missouri's permitting regulations for the 8-hour ozone nonattainment area are consistent with EPA's Phase 1 and Phase 2 8-hour ozone implementation rule or will be revised to be consistent when Missouri submits the ozone plan due June 15, 2007. Also, the document should further state that Missouri is implementing, in the absence of a final PM_{2.5} implementation rule, an interim PM_{2.5} program that involves implementing Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NNSR) programs for PM₁₀ as a surrogate for the PM_{2.5} requirements.

RESPONSE AND EXPLANATION OF CHANGE: As a result of this comment, the document language has been amended to more clearly define the program's intent to adopt EPA's regulations and policies related to changes in the implementation of the NAAQS. All major sources located in attainment areas in the State of Missouri are currently subject to PSD permitting under state rule 10 CSR 10-6.060 Construction Permits Required section (8). Major sources located in nonattainment areas are currently regulated under a NNSR permitting program required by state rule 10 CSR 10-6.060 Construction Permits Required section (7). Missouri believes that the current rule 10 CSR 10-6.060 Construction Permits Required rule meets the requirements of the Phase II ozone implementation rule as St. Louis is classified as a moderate ozone nonattainment area. Missouri will follow EPA's most current policy on the implementation of all PSD and NNSR regulations as they relate to the implementation of the NAAQS. Missouri will also adopt EPA's revised regulations implementing the revisions to the NAAQS as expeditiously as possible. This will include the adoption of permitting requirements into the state permitting rules as soon as possible.

COMMENT: For the portion of 110(a)(2)(D)(i) which addresses visibility protection, EPA suggests that the language be revised to state -- At this time, Missouri is assessing whether there is any interference with measures in another state designed to protect

visibility for the 8-hour ozone and PM_{2.5} NAAQS. Missouri is assessing visibility protection in conjunction with the Regional Haze SIP.

RESPONSE AND EXPLANATION OF CHANGE: In response to this comment, the language under the Visibility Protection portion of the plan has been changed to further describe how Missouri is addressing visibility protection. EPA has made no determination that emissions from any state interfere with 1980 visibility plan measures required to be included in a plan to address reasonably attributable visibility impairment. EPA is not aware of any certification of existing reasonably attributable impairment of visibility by a Federal Land Manager that has not already been resolved. Based on this information, no source in Missouri emits pollutants that interfere with measures included in visibility plans under 1980 regulations. At this time, Missouri's current nonattainment/maintenance plans for the 8-hour ozone and PM_{2.5} NAAQS are under development. It is expected that these plans will benefit visibility protected areas in Missouri and other neighboring states. This is primarily due to the inclusion of NO_x and SO₂ controls under the Clean Air Interstate Rule and NO_x SIP call regulations. Also, Missouri is working with the Central States Regional Air Partnership (CENRAP) regional planning organization in development of a regional haze plan that is due to be submitted to EPA December 2007. This on-going regional haze plan development process is intended to address incoming visibility impairing pollutants from sources in other states and Missouri source contribution on Missouri Class I areas as well as other states' protected areas.

The document has not been reprinted in the briefing document due to its volume. The entire document is available for review at the Missouri Department of Natural Resources' Air Pollution Control Program, 1659 East Elm Street, P.O. Box 176, Jefferson City, MO 65102-0176. It is also available online at <http://www.dnr.mo.gov/env/apcp/stateplanrevisions.htm>.

APPENDIX F

6.6 Appendix F MACC Adoption Certification

Pursuant to 643.055 RSMo, the Missouri Air Conservation Commission has determined that this action is needed to have a U.S. Environmental Protection Agency approved State Implementation Plan.

The State of Missouri Plan for Implementation, Maintenance, and Enforcement of National Ambient Air Quality Standards is hereby adopted by the Missouri Air Conservation Commission this 1st day of February, 2007.

M. R. Foreman, Chairman

APPENDIX G

6.7 Appendix G 8-Hour Ozone and Particulate Matter 2.5 Area Designations

Air Quality Designations and Classifications for the 8-Hour Ozone
National Ambient Air Quality Standards; Early Action Compact Areas With
Deferred Effective Dates

AGENCY: Environmental Protection Agency (EPA).
ACTION: Final rule.

SUMMARY: This rule sets forth the air quality designations and classifications for every area in the United States, including Indian country, for the 8-hour ozone national ambient air quality standard. We are issuing this rule so that citizens will know whether the air where they live and work is healthful or unhealthful and to establish the boundaries and classifications for areas designated as nonattainment. Children are at risk when exposed to ozone pollution because their lungs are still developing, people with existing respiratory disease are at risk, and even healthy people who are active outdoors can experience difficulty breathing when exposed to ozone pollution. In this document, EPA is also promulgating the first deferral of the effective date, to Sept. 30, 2005, of the nonattainment designation for Early Action Compact areas that have met all milestones through March 31, 2004. Finally, we are inviting states to submit by July 15, 2004, requests to reclassify areas if their design value falls within five percent of a high or lower classification. This rule does not establish or address state and tribal obligations for planning and control requirements which apply to nonattainment areas for the 8-hour ozone air quality standard. Two separate rules, one of which is also published today, set forth the planning and control requirements which apply to nonattainment areas for this standard. The second rule will be published at a later date.

EFFECTIVE DATE: This final rule is effective on June 15, 2004.

• 27. In Sec. 81.326, the table entitled ``Missouri--Ozone (8-Hour Standard)" is added to read as follows:

Air Quality Designations and Classifications for the Fine
Particles (PM_{2.5}) National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule sets forth the initial air quality designations and classifications for all areas in the United States, including Indian country, for the fine particles (PM_{2.5}) National Ambient Air Quality Standards (NAAQS). The EPA is issuing this rule so that citizens will know whether the air quality where they live and work is healthful or unhealthful. Health studies have shown significant associations between

exposure to PM_{2.5} and premature death from heart or lung disease. Fine particles can also aggravate heart and lung diseases and have been linked to effects such as cardiovascular symptoms, cardiac arrhythmias, heart attacks, respiratory symptoms, asthma attacks, and bronchitis. These effects can result in increased hospital emissions, emergency room visits, absences from school or work, and restricted activity days.

Individuals that may be particularly sensitive to PM_{2.5} exposure include people with heart or lung disease, older adults, and children. This rule establishes the boundaries for areas designated as nonattainment, unclassifiable, or attainment/unclassifiable. This rule does not establish or address State and Tribal obligations for planning and control requirements that apply to nonattainment areas for the PM_{2.5} standards. The EPA will publish a separate rule which will set forth the planning and control requirements that apply to nonattainment areas for the PM_{2.5} standards.

DATES: The effective date of this rule is April 5, 2005.

- 27. In Sec. 81.326, the table entitled ``Missouri.—PM_{2.5}'' is added to the end of the section to read as follows:
